

# ROCS Trading and Energy Agreements

**100%**

of our members annually  
review their agreements

**Farm Energy are NI's largest provider of NIRO Accreditation and NIROCs Trading services for independent Renewable Energy Generators. Utilising our substantial members base and selling power we have proven to offer the best ROC prices in Northern Ireland.**

The FENI team has extensive experience in OFGEM NIROs accreditation and unrivaled knowledge of the dealing with the OFGEM process, audits and queries

## ROCS Trading Services Agreement

Farm Energy NI offer two options for ROCs sales: the monthly auction or a fixed price buyout and recycle.

The 'Buyout' price is a price set by OFGEM which applies for a given 12 months 'compliance period' (April-March). The 'Recycle' price comes from the money collected from electricity suppliers by OFGEM.

We will pay all fees which may be incurred, such as auction fees and can submit all monthly data as required by OFGEM.

Our offers are based on 24-month to 5-year contracts. There are no administration fees associated with these offers.

If you enter into a Trading Services Agreement with Farm Energy NI, we do not charge any fees to submit Ofgem data or storage of your documents. We will provide you with an OFGEM Audit File and support you through any Ofgem audits.

“Farm Energy NI has secured me the best returns trading my ROCs and electricity. The service I receive is second to none. FENI continues to provide the best value for ROCs and undertakes all Ofgem accreditations for its members. I would most definitely recommend their services based on my own experience to date.”

**David Burgess, Co Down**

## Added Member Benefits

- Provision of an OFGEM Audit File
- HH Data Analysis & Reporting
- Online portal to view and report on your finances, production and site details
- Secure storage of Half-Hourly Data and Ofgem/ accreditation documents

## The Ofgem Audit File

Farm Energy NI can provide an Ofgem audit file for our members.

As the NIROC scheme has ended for new applications, Ofgem's focus now turns to the participants within the scheme and their compliance with the rules. Several of our members have had audits of their generating stations in recent months and we understand that the number of audits is expected to increase. Photographic evidence of meter readings, half hourly production data, NIE Network documentation and commissioning reports are some of the information required, usually with less than 10 days' notice. To help ensure a smooth audit, we can help our members by preparing a file of the most common documents and information requested by the auditors.

## Power Purchase Agreements (PPA's)

Farm Energy specialise in Energy Agreements for renewable energy generated from wind, hydro, solar and anaerobic digestion.

We have established good relationships with the NI power companies. Using group buying power we regularly go to market to secure the best financial returns for our members exported electricity. We encourage one simple rate for all members at the best prices available, so everyone is treated equally. We also keep an eye on the power companies and move contracts where required to protect members from price fluctuations or corporate instability.

Farm Energy NI will provide you with an OFGEM Audit File and support you through any Ofgem audits

We have bespoke options for every type of green energy generation – whether you have several sites or just one, and whether you want a fixed price or more flexibility. Our energy agreements are based on one to three year periods with no administration fees or exit fees.

Plus, we will enter your half-hourly data to Ofgem, store and protect the data, and analyse and report how your generating station is performing.

## Added Member Benefits

- Wholesale cost-plus for any energy used onsite with discounted admin charge
- Supply of 100% Green Energy to all sites and connected commercial units
- HH Data Analysis & Reporting
- Online portal to view and report on your finances, production and site details
- Secure storage of Half-Hourly Data and Ofgem/ accreditation documents

## Green Energy Supply

We believe Northern Ireland can be powered purely by renewables and want to do our part to help.

Farm Energy has long term agreements with over 150 independent generators who supply 100% renewable electricity from a mixture of wind, solar, hydro and AD.

We can provide all our generators, farms and associated businesses with their imported renewable electricity requirements so we all can do our bit for the environment.
